DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 6, drawn to a high-strength adhesive sheet, classified in class 442, subclass 59+.
- II. Claim 4, drawn to an apparatus for making a high-strength adhesive sheet, classified in class 414, subclass 904.
- III. Claim 5, drawn to a method of making a high-strength adhesive sheet, classified in class 427, subclass 208+.

The inventions are distinct, each from the other because of the following reasons:

- 1. Inventions III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the polyethylene may be applied via spraying rather than supplying a sheet of polyethylene with subsequent pressure bonding. This constitutes a materially different process capable of making the article of Invention I.
- 2. Inventions II and I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and

Page 3

Art Unit: 1771

materially different apparatus (MPEP § 806.05(g)). In this case the pressure roll and chill roller may be replaced with a spraying system and drying system capable of applying a coating of polyethylene with subsequent drying. This constitutes a materially different apparatus capable of making the article of Invention I.

- 3. Inventions III and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of III may use spraying means or a knife-blade applicator to apply the second polyethylene layer rather than the stripper roll and slitter provided in Invention II.
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- Due to the complexity of the restriction requirement, a telephone call was not made to 6. request an oral election to the above restriction requirement.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew D. Matzek whose telephone number is (571) 272-2423. The examiner can normally be reached on 8:30 am - 5:00 pm.

Art Unit: 1771

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terrel Morris can be reached on (571) 272-1478. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
